ABOUT C-WATER

C-WATER is specialized in the field of water treatment. To provide an independent technical consultancy and sell formulated chemical products and water treatment equipment. To commercial and industrial systems and components. You can be assured to find the right solution for any water treatment problems. We provide our beloved clients with detailed monthly reports. A fully equipped analytical laboratory is available for carrying out either routine water and deposit analysis or laboratory-scale investigations of field problems.

The total capability of C-WATER does not just own phrase. It is the unique formulation of new innovative products and program designs and continuing service through a well trained representatives who are backed by technical service specialists, and customer service lab to identify and monitor the solution of the problem under investigation, by providing a program of correct water treatment using the most modern and economical means available.

C-WATER After Sale Service is possibly the most important aspect of the services we offer and is much appreciated by our customers.

WATER TREATMENT CHEMICALS.

Steamed Treatment.

- Anti-Scaling.
- Corrosion Inhibitor.
- Anti-Foam.
- Sludge Conditioners.
- Fuel oil treatment.

Heating Systems.

- Anti-Scaling.
- Corrosion Inhibitors

Swimming Pools.

- Disinfectants
- Biocides
- pH – Adjustment

Cooling Systems.

- Scale Clean.
- Anti-Scaling.
- Corrosion Inhibitor.
- Sludge Conditioners.
- Micro-Biological Treatment.

Domestic Water.

- Anti-Scaling
- Corrosion Inhibitor
- Flocculants
- Disinfectants

Chilled Water System.

- Cleaning Chemicals.
- Anti-Scaling.
- Corrosion Inhibitors.
- Micro-Biological Treatment.

Reverse Osmosis.

- Anti-Scaling
- Cleaning

EQUIPMENT SUPPLY AND MAINTENANCE

- Water Deionizers And Softeners (Anionic, Cationic, Mixed Beds).
- Chemicals Dosing Pumps (Different Manufactures).
- Multimedia Filtration Unit (Sand Filters, Carbon Filters.....).
- Automatic Control Systems And Sensors (PH, Conductivity,.....).
- Water Analysis Testing Kits.

PLANT DESIGN AND INSTALLATION

- Grey water treatment plant
- Water resuse plant:
 - Water Treatment Plant.
 - Reverse Osmosis Units.

Walchem

Walchem's family of cooling tower, boiler, metal finishing, industrial and municipal water treatment analytical controllers is designed with a total quality commitment that starts with the best design engineering in the industry and continues throughout all stages of the manufacturing process.

The WCT100/600/900 Cooling Tower Controllers represent the latest in technological and innovative advancements from Walchem. All of the standard features you'd expect from a conventional cooling tower controller are included, plus optional simple-to-use information management tools that enable water treatment professionals to deliver more effective service to their customers.

Types of Sensors:

Conductivity – PH- ORP – Disinfection – Pyxis Turbidity – Copper/Nickel – Pyxis Fluorometers – Little Dipper – Pyxis oil in water – Pyxis Dissolves Oxygen – Pyxis Handheld

Metering Pumps:

Featuring four great pump series, EZ, EWN, EHE, and EJ, E Series metering pumps are powered by advanced microprocessor-based electronics and superior mechanical design. With capacities up to 20 GPH (76 l/h) and pressures to 290 psi (20 bar), E Series has a pump that will fit most any industrial, municipal, or agricultural water or wastewater application. And, the entire E Series pump line is backed with a comprehensive 2-year warranty that covers the entire pump, including the liquid end and diaphragm

TIMEX

TIMEX aims to offer tailor made solutions, with high quality standards, to many different sectors with maximum efficiency.

Timex Filters continues to lead the industry in the design and manufacture of the most rugged, reliable and efficient automatic equipment for filtration and separation. The InterSeptor Centrifugal Separator style ICS2 continues in this tradition. Their ICS2 Separators are available as stand alone units or skid mounted systems (ICS2-TCP). The ICS2 is effective in removing suspended particles 40 micron and larger from a flow stream. Depending on the specific gravity of the particle and the viscosity of the carrier fluid retention as small as 5 microns is possible.

ETATRON

Etatrons.s.

Etatron's range of pumps, controllers, chemical holding tanks, agitators, mixers and accessories.

Etatron has significant expertise in Chemical Dosing Metering Pumps, Controllers and Chemical Dosing Systems. If you are looking for solutions in automated chemical dosing, chemical dispensing diaphragm and peristaltic pumps then Etatron will have the solution for you.

aquatreat®

Aquatreat

Is a liquid corrosion-inhibitor for closed recirculating cooling water systems, hot-water systems. It is a low-toxic corrosion-inhibitor that can be used to protect most metals against corrosion in most extreme circumstances of pH, temperature and water-quality. It can be used in all closed systems such as hot-water systems, cold-water systems, ice-water systems, glycol-systems, brine-systems and gas-washing-systems. It is based on nitrite-borate-silicate, organic copper inhibitors and strong organic dispersants. It does not contain heavy metals, neither phosphates.

For more than 30 years International Aquatreat Co. designs, develops and produces chemicals for industrial water treatment. Aquatreat is your specialist in water treatment of cooling water, boiling water, process water, drinking water and membrane technology.

Fine Chemicals

YEARS
OF SUCCESS **18**

After 18 years of Experience

We are proud to say that we have received quality assurance certificates, and that we have dealt with over fifty clients including national and international ones.

Our services do not only include a unique formulation of new innovative products and program designs carried out by well-trained representatives who are backed by technical service specialists, and finally a very professional customer service lab to identify and monitor the solution of the problem under investigation, by providing a program of correct water treatment using the most modern and economical means available.

C-WATER After Sale Service is possibly the most important aspect of the services we offer and is much appreciated by our customers.

**YEARS
OF SUCCESS**

18

We have the pleasure to confirm to your good selves that we are successfully treating in Egypt and Middle East since more than 18 years – the water systems of more than 200 Customers.

Among our esteemed customers are the following:

PUBLIC DIVISION

Customer	Area
Cairo Airport	Cairo
Central Bank Haram	Cairo
Sama Building	Cairo
Viewing tower	Cairo
Dar Al-Kuttoub.	Cairo
Eastern Co.	Cairo
Central Library (Cairo Univeristy)	Cairo
Cairo International Conference	Cairo
T.V Building	Cairo
San-Misir Petroleum Company	Cairo
Kuwait embassy	Cairo
Price water house	Cairo
Town Gas	Cairo
Building 47	Cairo
Tharwa Building	Cairo
Egypt clearing Building	Cairo
CFC irrigation pipes disinfection	Cairo
